

**International Institute of Health Management Research, New Delhi**  
**Hospital Management Information System (HMIS) – HOM 709**  
**TERM EXAMINATION for 2016-18 Batch**

**All Questions are Compulsory, and All Questions carry equal marks (14 Marks each)**

**Discuss on the following topics:**

1. What are the factors that you would consider for selecting and justifying the architecture of an HMIS (Hospital Management Information System)?
2. What should be the essential elements in the structure of an HMIS for a 10-bed hospital and for a 1000-bed hospital?
3. How should the HMIS be organized for optimizing the workflows of a hospital?
4. How would you ensure data quality for accurate information collection and processing from an HMIS?
5. How can you analyze information from an HMIS and apply it for decision support?
