GAP ANALYSIS

SADAR HOSPITAL, Bhabua Kaimur, Bihar

PREPARED BY:
DEEPIKA JOSHI

Certificate of Internship Completion

Date: 3/05/13

TO WHOM IT MAY CONCERN

This is to certify that Mr./Ms./Dr. Deepika Joshi has successfully completed his 3 months internship in our organization from January 10, 2013 to April 10, 2013. During this intern he has worked on Gap Analysis.....(task performed) under the guidance of me and my team at D.P.M., Bhabua.....(organsiation).

.....(any positive/negative comment)

We wish him/her good luck for his/her future assignments

FEEDBACK FORM

Name of the Student: Dr. Deepika Joshi

Dissertation Organisation: Sub Divisional Hospital, Mohania

Area of Dissertation: Gap Analysis of DH, Bhabua

Attendance: 100%.

Objectives achieved: She helped in operationalizing OT and was instrumental in successfully starting C-section in the hospital.

Deliverables:

Strengths: Perseverance, Amiable, Hard-working, Skillful and gets along well with people.

Suggestions for Improvement:

Signature of the Officer-in-Charge/ Organisation Mentor (Dissertation)

Date: 03/05/13
Place: Kaimur, Bihar

ACKNOWLEDGEMENT

It gives me immense pleasure to acknowledge my indebtedness and deep sense of gratitude to **Dr. RasBihariSingh (Civil Surgeon)** for giving me valuable persistent encouragement and inspiring guidance in the due course of **As Is Report** data collection, compilation, analysis and report writing.

I also want to express my heartfelt gratitude to **Mr. Somit Pal (District Program Manager)** and **Dr. S. C. Lal (Deputy Superintendent)** for providing thoughtful suggestions, encouragement and guidance during the entire duration of **As Is Report** compilation.

Also my warmest thanks the entire staff for their cooperation and for providing all the relevant information and sharing their knowledge and experience.

Also my warmest thanks to **Mr. Shashi Ranjan (Head Clerk)** for his active co-operation without which, it would not have been possible to accomplish this task.

1. EXECUTIVE SUMMARY

District Hospital Bhabhuacaters to the people living in urban and rural people in the district. District hospital system is required to work not only as a curative centre but at the same time should be able to build interface with the institutions external to it including those controlled by non-government and private voluntary health organization. This hospital is situated in Kaimur (Bihar). This hospital is Referral hospital for Primary Health centre & Sub-centers. This hospital covers the 19 Subcentres and APHCs. It covers 24,50,000 population. The number of beds available in the Hospital is 218. The Hospital compound is good and enough area for patients care. Environment is good surrounding of the hospital. Available of all departments is the positive point of the hospital but not in good condition and need to properly maintain. Transporting facility is good and the road is very good in condition. Patient comes easily in the hospital.

The 'As Is Report' includes documentation and review of manpower, equipment, infrastructure, processes including training and capacity building activities, services & facilities provided legal compliances etc against IPH Standards. For this the format for "Facility Survey" available in IPHS guidelines was used to capture the data.

The whole report is submitted as under

1. Describes the process flow of all the departments in the Sadar hospital, Bhabua, with the identification of process Owners, Input(s), Outputs (s) and process flow of each process occurring at different sections of the hospital with the relevant records.
2. Identifies the significant gaps observed on all the processes in each section and explanation of the gap statement with document evidences and photographs. The gaps are analyzed based on IPHS standards.
3. The annexure which contains the details collected in the Sadar hospital, Bhabua.

The major findings of the study are as:

1. The approach road to the Hospital is not tarred and is converted in to a pool of water during rainy season.
2. Laboratory services of hospital are a major handicap for smooth functioning of Hospital. Most of the equipments are old, space has not been provided for the department.
3. Essential equipments such as crash cart, dressing trolley, emergency tray are not available in patient care areas.
4. The departments are not arranged as per the patient needs. The labour room is in first floor but ramps have not been provided.
5. Maintenance of the building is not being carried out. Drainage is a major problem in the hospital leading to water logging.

6. All the departments need minor redesigning for smooth functioning.
7. Infection control practices are non-existent and staff is not trained in these.
8. There is no system of allotting Unique ID numbers for each patient at the time of OPD Registration. The patients are registered and the Registration number changes every month and data for revisit patient is not captured.
9. The maintenance of the hospital building, premises and equipment is not being done periodically and hence are in dilapidated condition.
10. Fire safety issues are not addressed. There are loose electrical wires posing the danger of electrical shock and fire.

2. RESEARCH METHODOLOGY

Research Methodology

Stage I:

SURVEY:

IPHS Checklist was used for a total survey of the hospital in terms of services provided, Manpower, Physical infrastructure, Equipment, drugs and Labservices.

Stage II:

Observation and personal interview were used to map the various processes of the hospital and to know the functioning of the each department.

Stage III

Extensive analysis based on data collected from stage I and Stage II. Based on this AS IS Report was prepared reflecting the processes, Infrastructure, Equipment, and Manpower. The report reflects strengths of the hospital and various gaps observed in the processes and other parameters.

Area of Study

The study was under taken in Sadar Hospital, Bhabua, Bihar.

3. STRENGTHS

- The hospital is located in the centre of the town and easily approachable. The hospital is in close proximity to bus stand.
- The hospital serves as a referral centre for the whole district and caters a large population.
- The hospital has all the major specialties and trained manpower to deliver the services.
- The RogiKalyanSamiti is very effective in this hospital.
- Involvement of private sector in the hospital functioning is working very efficiently and effectively.

4. WEAKNESSES

- The Physical infrastructure is in a bad shape and needs development and renovation.
- Doctors requirements are not filled as per Patient load and IPHS standard
- Weak peripheral health care system needs to increased patient load and hence departments have not been developed as per the district hospital standards.

5. OPPORTUNITIES

- Availability of space for the development of hospital
- Proper planning and coordination with DHS, NRHM and RKS can lead to development of services and better delivery of health care in an integrated way.
- The centre can be developed to serve as a training centre for junior doctors and paramedical staff.
- Willingness of Government to Empower the Leadership
- Devolution of powers at local level for smooth functioning
- Involvement of Local Population in Development

6. LIST OF PERCEIVED CHALLENGES BY LEADERSHIP TEAM

- Decentralization of decision making at the Hospital level.
- Following all legal requirements such as AERB, BARC, etc.
- Following infection control practices.
- Upkeep and Sanitation of Hospital building and environment.
- Rearrangement of the various facilities as per the flow of the patient.
- Provision of lift services in the OT and Labour room.

Input(s)	Patient for surgery	Output(s)	Total no. of surgery done per day, Total no. of surgery cancelled
Process Flow / Process Description.			
<ol style="list-style-type: none"> 1. Patient identification is done by nurses and surgeons. 2. Patient is shifted to the main operating room. 3. After surgery is done patients are monitored in the recovery room till fully conscious. 4. Patient are shifted to respective wards. 			
Records generated		Operation notes / OT register	

Process Group	OT	Sub-Process	OT cleaning
Process Location	OT	Process Owner	OT technician
Input(s)	Cleaning schedule of OT	Output(s)	Hygienic OT
Process Flow / Process Description.			
<ol style="list-style-type: none"> 1. After surgery instruments / Linen is cleared by the staff nurse/ Technician 2. The HK staff under Technician supervision cleans the OT table and surrounding area with phenyl and water. 3. The OT technician checks the equipments and OT table. 4. Fumigation of OT is done after 15 days or one month depending on availability of OT . 			
Records generated			

B.(4.2)- For gap analysis

Gap ID No	OT001
Gap Statement: OT Design is not as per standards.	

Rationale / Explanation:

- OT is not designed as per the standards
- Washing/ scrubbing/ change room are all in the main operating room.
- The sterility of the place is far from satisfactory
- There is no room for storage of supplies
- Windows are kept open in the OT during operation.

Gap Classification		*Gap Severity Rating
Structure		High
Gap Reference	IPHS 7.8.1.(X)	
Supporting Annexure		

Technician keeping cloths and gauze after sterilization

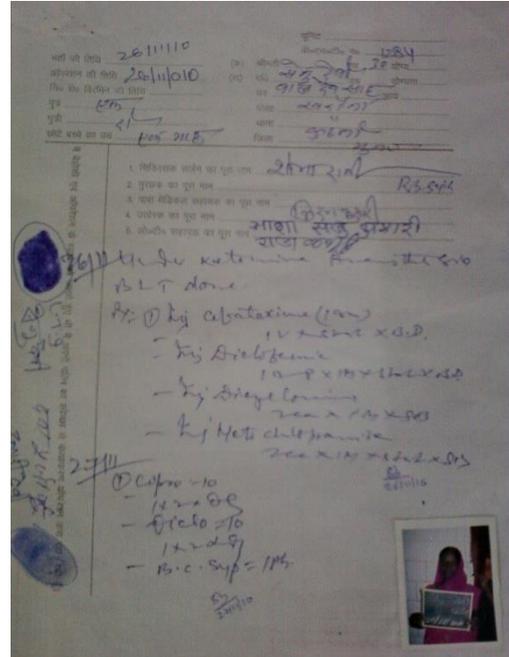

Equipments present in major OT

Gap ID No		OT002
Gap Statement: Infection control and hygiene of the Operation Theatre is not maintained.		
<ul style="list-style-type: none"> • Rationale / Explanation: • The theatre does not follow basic zoning principles • There is no entry restriction barrier at the main entrance area of the theatre. • There is no change room for staff • Window AC is placed in the OT with no mechanism of cleaning and change of filter. • Fumigation is done once in 15days or one month depending on availability. • Carbolization of OT table and other surfaces not being done. • Swab testing at regular intervals is not being done. • No set protocol for cleaning and scrubbing of OT 		
Gap Classification		*Gap Severity Rating
Process		High
Gap Reference	IPHS 7.8.1.(X)	
Supporting Annexure		

Scrub area for doctors

Consent before surgery

Gap ID No		OT003
Gap Statement: There is no well-equipped and functional recovery area attached to the theatre		
Rationale / Explanation:		
<ul style="list-style-type: none"> • The following equipments are not available in the OT: • Crash cart • Suction Apparatus • Multi Para monitor • Defibrillator • Ventilator • Central oxygen • There is no recovery room or critical room attached with OT/ in the hospital

8.5. LABOR ROOM

One labor room is present in the hospital which is situated in the female building ward of the hospital. It is on the first floor of the building. It has 6 labourtables which is functional. In labour OT there is one labour OT assistant. There is a boiler which is used for sterilizing the equipments. There is also an autoclave machine which is out of order. The labour patients come to the labour room after registration. After consultation, the doctor advises either for admission for observation or admit to labour room for delivery.

Equipments kept after operation

Protection not used by OT staff

Autoclave in Labour OT

after washing equipments kept on rack

Equipments in labour OT

Soiled linen kept in the bucket

Condition of labor room

Dustbin in labour room

A. (6.1) for process flow

Process Group	Labor room	Sub-Process	Delivery
Process Location	Labourroom	Process Owner	Consultants
Input(s)	Nos. of patients admitted for delivery	Output(s)	Total number of normal/ Caesarian cases /day
Process Flow / Process Description			
<ul style="list-style-type: none"> • Patients are admitted in the labour ward prior to delivery • At the time of delivery patients are shifted to the labour room • After delivery patients are shifted to the female ward • In case of complication patients are shifted to OT for LSCS. 			
Patient Records			

B. (6.2) for gap analysis

Gap ID No		LR 001
Gap Statement: The Labour Room has poor infrastructure and does not have basic facilities.		
Rationale / Explanation:		
<ul style="list-style-type: none"> • No sterile store • No hand washing liquid present • No trolley bay • No changing room for facility staff and patient • No toilet • No ramps for emergency delivery patient.
