S. No.	Indicator	Sample Size	Type and No of Responses		Respons e Percena tge	Bench Mark
	Percentage of medication errors	N value	Type	Number		NIL
		900	Number of medication errors reported	20	2.22%	
Formula: Number of reported medication errors / Total number of inpatients on medication X 100						
This indicator has been taken for In patients only.						
Analysis: While the total no of patients during the month were 900 and out of these 20 had medication error because all the nursing staff are well trained and verification is done before giving medicines to the patients . Right drug, right dose, right route and timings are verified. If in case there is any confusion regarding this , nursing staff confirm the same with duty doctors.
