IIHMR DELHI | INTERNATIONAL INSTITUTE OF HEALTH MANAGEMENT RESEARCH

Fellow Program in Management

2024-2027 Batch

2nd Semester End Examination

Course & Code	:	**Global Health-FP 732**	**Reg. No. :**
Semester & Batch	:	**II, 2024-2027**	**Date : 21-08-2025**
Timing & Duration	:	**02:00 – 05:00 P.M. (3 Hrs.)**	**Max. Marks : 70**

Instructions:

- Budget your time as per the marks given for each question and write your answer accordingly.

Part-A: Q.1 to Q.6 (5 questions *6 Marks = 30 Marks) Attempt any five.

1. Distinct 'global health' from 'international health' and 'public health'.
2. List and describe WHO health systems building blocks? In current socio-economic and political scenario should there be additional building blocks that can accelerate the achievement of SDGs?
3. What is equity? Discuss the opportunities to promote equity through global health.
4. Discuss the role of the enabling environment framework in achieving SDG 3.
5. What are the building blocks of the health system? Discuss 5 indicators related to health workforce.
6. Describe the socio-political context that led to SDGs.

Part-B: Q.7 to Q.11 (4 questions *10 Marks = 40 Marks) Attempt any four.

7. What are PHIECs? What are the prerequisites for a country's health system to effectively implement IHR?
8. With reference to the one-health approach, please propose an intersectoral coordination plan for TB elimination.
9. Discuss the core values of global health and their relevance in the changing socio-political environment.
10. A philanthropist has offered to donate Rs. 50 crores to your organization/office to develop a hi-tech solution for the treatment of a rare disease. The philanthropist feels that you are the right person to receive this donation because both of you belong to same gender, religion, caste, and community. This donation can significantly improve your organization's budget, and you also have the team that can deliver. The terms and conditions of the donation specifically state that the hi-tech solution will be made available free of cost to the patients of your religion, caste, and community and other patients will have to pay a price with a target to generate Rs. 50 crores revenue in one-year.
    One on hand, you are excited about receiving a donation and an opportunity to work on a hi-tech solution but on the other hand, you are uncomfortable with the terms and conditions.

Contd…2..

Please discuss the moral and ethical dilemma that you are struggling with and distinguish between the 2. What are the steps you would like to take to address and resolve this dilemma? Do you perceive any benefits in consulting/discussing this dilemma with the philanthropist and other stakeholders?

11. In a metropolitan city, every year during the monsoon season 4-5000 cases of leptospirosis and 7-10 deaths are reported by the local media. On 25 August 2024, the leading daily newspaper reported death of 3 infants and 2300 cases of leptospirosis in 4 slums of the city.

    In response to this report, the Municipal Corporation commented that the cases are fewer than those reported by the media and the deaths are not due to leptospirosis. The administration also emphasized that during the monsoon only minor inconvenience is faced by citizens like the ones faced by people in other tropical countries and the situation is well under control.

    You are a consultant at the health department and the Joint Director has asked to manage this issue. **Please list 5 questions (or more!) that you would like to ask the media and the administration to effectively prevent and control leptospirosis in the city. Against, each question please draft a response/answer that can help you manage/respond to this issue.**
