ANNEXURE-2

Tables

Table 3.3.4.1: Pregnancy Complications

Indicators	Percentage (%)
Pregnancy related advice:	
Sahiyya	37
ANM	38
Dai	25
Visit Sahiyya/ANM during pregnancy- advice received:	
Yes	25
No	75
Advice:	
Not to take heavy weights	50
Refer to government hosp. for regular check-ups	25
Take proper nutrition	25
Knowledge of women suffering from pregnancy complication:	
Yes	40
No	60

Table 3.3.4.2: Antenatal Care

Indicators	Percentage (%)
Preferred place for antenatal care:	
Government hospital	78
Private Clinics	22
How frequently TT injections should be taken:	
Interval of 1month	23
Interval of 3 months	7
At 3rd & 6th month	7
At 3rd & 7th month	15
At 5th & 7th month	8
At 4th & 5th month	8
At 5th &6th month	8
3 injections of TT should be given	8
4 injections of TT should be given	8
2 injections of TT should be given	8
Period of Antenatal Visit:	
Every month	45
4 visits during pregnancy	18
Only once	18
3 times	9
2 times	10

Table 3.3.4.3: Practise during delivery

Indicators	Percentage (%)
Preparation for child-birth:	
Don't know	62
Take IFA tablets	13
Not to take heavy weights and proper nutrition	25
Most common place of delivery:	
Government hospital	37
House	63
Best place for delivery:	
Hospitals	70
House	30

Table 3.3.4.4: Complications during childbirth and the puerperium

Indicators	Percentage (%)
Knowledge of problems during child-birth:	
Dizziness	12.5
Labour Pain	12.5
Joint Pain	12.5
Excessive bleeding	12.5
Back ache	12.5
Caesarean Complication	37.5
Problems women can have after child-birth:	
Fever, excessive bleeding	33
Don't know	67

Table 3.3.4.5: Antenatal Care

Indicators	Percentage (%)
Care during pregnancies:	
TT injection	20
Nutrition	10
Delivery shouldn't be conducted in a cattleshed, child shouldn't be covered by cowdung, because it may cause infection	50
Should take proper medicine & boiled water	10
Refrain from taking heavy weight, shouldn't undergo sex	10
Take care of B.P, take care of health	0
Problems women may suffer during pregnancy:	
Swelling of hands and feet	20
Paleness	0
Weakness or tiredness	10
Dizziness	20
Visual disturbance	0
Bleeding	20
Convulsions	0
Weak or no movement of foetus	0
Abnormal presentation	0
Vomiting	10
No taste for food	0
Infection in urinary tract	10
Pain in lower abdomen	10
White discharge	0
Lack of appetite	0

Table 3.3.4.6: Natal Care

Indicators	Percentage (%)
Knowledge:	
5 cleans of delivery:	
Clean Soap	10
Clean hands	20
Clean blade	10
Clean threads	10
Clean place	20
Fold sleeves of blouse	0
Child shouldn't be put on bare floor	10
Wear gloves	10
Clean gauge	10
Danger signs of Delivery:	
White Discharge	10
Excessive bleeding	30
Back ache	10
Uterus doesn't open during delivery	10
Paleness or blood pressure problem	10
Child in wrong position	0
Placenta don't come out	10
Don't know	20

Table 3.3.4.7: Post-natal Care

Indicators	Percentage (%)
Should a baby be given colostrum:	
Yes	90
Don't know	10
Period of complete breastfeeding:	
6 months	20
8 months	10
9 months	40
1 year	30
Advice given to mother after delivery:	
Minor exercise	0
Colostrums feeding and exclusive breastfeeding for 4 months	20
Proper nutrition	30
Regular growth monitoring of the baby	10
Bring the mother for regular check-up	40
Advice regarding child immunization:	
No	20
Yes	80
Promote spacing after childbirth:	
No	30
Yes	70

Table 3.3.4.8: New-born Care and Care after Pregnancy

Indicators	Percentage (%) N=10
Care of a new-born child:	
Clean the mouth with clean gauze	30
Clean the eye with clean boiled cotton	30
Cover the body with cloth	20
Wash the baby	20
Danger signs of mother after pregnancy:	
High fever	20
Excessive bleeding	10
Body & Headache	10
Pneumonia	10
Dizziness	20
Convulsion	10
Tetanus disease	10
Bleeding	10
